

## LEVEL 1

Introduction to Sustainability

Introduction to Regulatory Environment and International Cooperation

Sustainability for Fertilizers

Sustainability in Different Regions

Global Agricultural Innovation and Investment

Sustainability Methodology, Measurements and Evaluation

Introduction to Sustainable Finance

Biodiversity: The next wave in sustainability - Impacts, risks and opportunities for the fertilizer industry

## LEVEL 2

### Product Stewardship

Green and Circular Economy

Safety and Security in Production

Fertilizer Quality and Quality Control

Sustainable Ammonia Production - Part 1

Sustainable Ammonia Production - Part 2

Sustainable Phosphate Production - Part 1

Sustainable Phosphate Production - Part 2

Sustainable Mining

Ammonia Technology Roadmap

Finance for Sustainability

Sustainable Water Management

Net Zero Emissions

Scope 1 & 2 Emissions Reporting

Scope 3 Emissions Reporting

### Nutrient Stewardship

A New Paradigm for Plant Nutrition

Nutrient Budget and Nutrient Use Efficiency

Policies and Roadmaps for Sustainable Nitrogen Management

Data-driven, more Precise Crop Nutrition

Nutrient Recovery and Recycling

Technology Innovation and Novel Fertilizers

Nutrient Stewardship Practice

Sustainable Food Production Chains

Biodiversity and Fertilizer Use
